

Baby Alive Lulu Achoo

(HASBRO/Ages 3 years & up/Approx. Retail Price: \$52.99/Available: Spring 2021)

“Sniff, sniff ... ACHOO!” Baby Alive Lulu Achoo doll actually sneezes and moves her hands up towards her face! She needs kids’ help to feel better. When Lulu’s not well, she makes sounds and her nose and forehead light up red. Use the included doctor station to find out why she isn’t feeling well, and how to make Lulu Achoo better. Does she need her cloth tissue or make-believe bottle? Or pretend medicine from her spoon? This doctor playset features toy check-up accessories, including a doctor station with attached play stethoscope, pretend thermometer, tissue, spoon and bottle. With eyes that open and close, this 12-inch interactive doll responds to kids’ care with 50+ reactions, including lights, sounds and movements. Her forehead even lights up with the play thermometer! When Lulu Achoo is feeling better, she giggles and moves her arms! Available at most major retailers.
